

IN THE SPECIFICATION:

Please delete the paragraph starting at line 20 on page 10 and replace it with the following paragraph:

When the portion of the wall of borehole 11 represented in Figure 3A is unrolled to a flat position, the ellipse 57 appears as a sinusoid 58 as shown in Fig. 3B. The location of trace-intersect points $Z_1 - Z_4$ are shown on sinusoid 58. In addition, if traces ~~22a—22d~~ S2a—S2d in level L2 of Fig. ~~4B~~ 1A were shown plotted on Fig. 3A, which they are not since they are not in level L1, they would appear in Fig. 3B as the four intersect points $Z_5 - Z_8$ and are interspaced between points $Z_1 - Z_4$ on sinusoid 58 as shown. With all eight intersect points shown in Fig. 3B it can be seen how a dipping event is represented as a sinusoid 58.
